CAREER OBJECTIVE

Aspiring Software Developer with a Bachelor's degree in Electronics and Communication Engineering and strong programming skills in Python, Java, and web technologies. Demonstrated ability to apply analytical skills and critical thinking to deliver innovative ML/AI solutions. Passionate about problem solving, innovation, and building scalable, secure applications. Experienced in both independent research and teamwork-driven environments. Eager to leverage technical depth and experiment with emerging technologies to drive impact at scale.

EDUCATION

Bachelor of Technology – Electronics and Communication Engineering 2021 – 2025
CMR Institute of Technology, Hyderabad **CGPA:** 7.33/10

TECHNICAL SKILLS

- **Programming Languages** : Python, Java, C
- **Data & Analytics** : SQL, Data Analysis, Machine Learning Basics
- **Web Technologies** : HTML, CSS, JavaScript
- **Tools & Platforms** : Git, GitHub, VS code
- **Concepts** : Data Structures, Data Modeling, Data Visualization Fundamentals
- **Common skills** : MS office (Word, PowerPoint)

PROJECTS

Offline Signature Verification using Artificial Immune Recognition (AIS)

- Developed a biometric authentication system using **Artificial Immune Recognition System** to detect forged signatures.
- Applied **feature extraction and classification algorithms** on signature datasets to differentiate genuine and forged samples.
- Optimized AIRS parameters and model configuration, improving classification reliability and system accuracy.
- Conducted experiments on multiple datasets to evaluate system robustness against skilled forgeries.
- Delivered an automated verification solution that strengthens **fraud detection and secure identity authentication**.

Applying Machine Learning Algorithms for the Classification of Sleep Disorders

- Built machine learning models using **Decision Tree, Support Vector Machine (SVM), Random Forest, and Artificial Neural Networks** to classify sleep disorders from medical datasets.
- Implemented **Genetic Algorithms for feature selection and hyperparameter optimization** to improve model performance.
- Achieved **78% classification accuracy** using an optimized Artificial Neural Network model.
- Developed a scalable data-driven solution that supports **early detection and analysis of sleep disorders**.

INTERNSHIP

Intern – Pantech Solutions Nov 2024 – Feb 2025

- Developed full stack applications using Python, Java, JavaScript, SQL, and Git, applying strong problem-solving and analytical skills across the software development lifecycle.
- Collaborated with senior engineers to build real-time applications, contributing to both frontend and backend development in a fast-paced environment.
- Executed database operations including SQL queries and CRUD operations, ensuring data integrity, consistency, and adherence to project standards.
- Troubleshot full stack issues using analysis and debugging to resolve defects, and supported team onboarding as a technical buddy.

Python Programming Intern – Edugene Technologies Aug 2023 – Oct 2023

- Gained practical experience in Python programming and project development.
- Built Python-based applications, improving problem-solving and coding efficiency.

CERTIFICATES

- Certificate on completion of the online course on AI/ML Geodata Analysis by IIRS, Dehradun.
- Completed Certification in HTML/CSS – LetsUpgrade
